Globally, COVID-19 cases have surpassed 305.9 million with more than 5.4 million deaths.

In the United States, the total number of cases stands at 59,521,277 and deaths at 834,077.

Pfizer boosters are now approved for age 12 and up. If your child was vaccinated for COVID-19 5 months ago or more, schedule their booster shot now on My Turn.

In 19 California counties, less than a third of vaccinated residents are boosted. In some counties, it’s less than 25%. Only 38% of vaccinated Californians have gotten a booster shot. Counties in the far north and rural areas continue to see lower numbers, with as few as 23% of vaccinated people getting a booster in Mariposa, Colusa and Merced counties. Nearly 64% of older adults have been boosted. But for younger Californians, getting an additional dose is far less common. Only 47% of those aged 50-64 have been boosted. Forty-four counties have boosted less than half their population in this age group.

California would spend $2.7 billion on new efforts to respond to the surge in COVID-19 cases, including additional testing capacity and assistance to hospitals, under a budget proposal Gov. Gavin Newsom will send to state lawmakers next week. Newsom will also ask legislators to help craft new COVID sick pay rules for Californians, modeled after the policy that expired last fall, requiring businesses with 26 or more workers to offer up to two weeks of supplemental paid sick leave for employees to care for themselves or a family member.
