Globally, COVID-19 cases have surpassed 452.2 million with more than 6 million deaths.

In the United States, the total number of cases stands at 79,346,678 and deaths at 965,336.

A worldwide emergency such as the COVID-19 pandemic has affected people around the world and in the U.S in many ways. The Federal Emergency Management Agency (FEMA) within the U.S Department of Homeland Security Region 2 announced a webinar on social reinsertion during the pandemic. This FREE webinar will take place on Wednesday, March 23, 2022 from 1:00 PM-2:00 PM EST and will help the whole community to manage the fear of leaving home during the COVID-19 pandemic. Register for the webinar HERE.

Earlier this year, the White House announced that they would be supplying Americans with a set of four free at-home COVID-19 rapid tests. Starting now, residents of the U.S. and territories can place second orders of rapid at-home tests. Like the previous order, these kits will contain four COVID-19 tests. How to place a second order: click HERE, click the blue-button that says, “order free at-home tests”, fill out the information with your residential address, click the green button that says “check out now”. If you never placed your first order, you could still place your first and second orders. To do this, complete the order process above TWO times.

COVID-19: U.S. at a Glance*
- Total cases: 79,346,678
- Total deaths: 965,336
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
- i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data
- Total tests reported: 831,032,451
- Positive tests reported: 77,814,178
- Percent of positive tests (7-day): 2.7%
As of March 10, 2022, CDC data shows that AIAN nationwide still have the highest rates of hospitalizations and deaths due to COVID-19 than any other race/ethnicity.

As of March 14, 2022, there were a total of 8,438,328 positive cases and 86,794 deaths in California.

Confirmed positive cases by gender:
- Female: 4,303,547
- Male: 3,966,014
- Unknown: 168,767

Confirmed positive cases by age:
- Age 0-17: 1,603,282
- Age 18-49: 4,637,780
- Age 50-64: 1,434,516
- Age 65 and older: 758,910
Coronavirus Disease 2019 (COVID-19)  
Situational Report #412 March 14, 2022

Indian Health Service California Area

167,278 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 3/13/2022. Of these, 19,108 patients have tested positive for COVID-19 and 141,012 have tested negative for COVID-19. The 7-day rolling average positivity rate is 4.5%.

**COVID-19 VARIANTS OF CONCERN, CALIFORNIA**

As of March 9, 486,953 samples have been sequenced in California. In February 2022, 10% of 312,647 cases in California had been sequenced. In January 2022, 2% of 2,520,336 cases were sequenced. In December 2021, 9% of 694,243 cases were sequenced. The chart below shows the percent of specimens sequenced by month that are variants of concern/interest. The table below shows the percent of specimens sequenced by recent weeks that are variants of concern/interest statewide.
