

HIGHLIGHTS

Globally, COVID-19 cases have surpassed 497 million with more than 6.1 million deaths.

In the United States, the total number of cases stands at 80,218,444 and deaths at 982,809.

The CDC now recommends a second booster shot for people over 50, those who are immune-compromised, and those who got the Johnson & Johnson vaccine. It must be at least 4 months since you got your first booster. See if you're eligible [HERE](#).

A fourth dose of the Pfizer/BioNTech Covid-19 vaccine seems to offer short-lived protection against infection overall, but protection against severe illness did not wane for at least several weeks, according to a new study. The rate of severe Covid-19 infection in the fourth week after a fourth dose of vaccine was lower than in people who got only three doses by a factor of 3.5. The rate of confirmed infection in the fourth week after the fourth dose was lower than in the three-dose group by a factor of 2. The US Food and Drug Administration's independent vaccine committee meets Wednesday to discuss what the country's booster strategy should be going forward. Some experts have suggested that the Covid-19 vaccine could become an annual shot like the flu vaccine. It is unclear how many eligible people will get a fourth Covid-19 shot. About 66% of the US population has gotten at least one Covid-19 vaccine, but only 30% of people are fully vaccinated with a booster dose, according to the US Centers for Disease Control and Prevention.

UNITED STATES

COVID-19: U.S. at a Glance*

- Total cases: 80,218,444
- Total deaths: 982,809
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

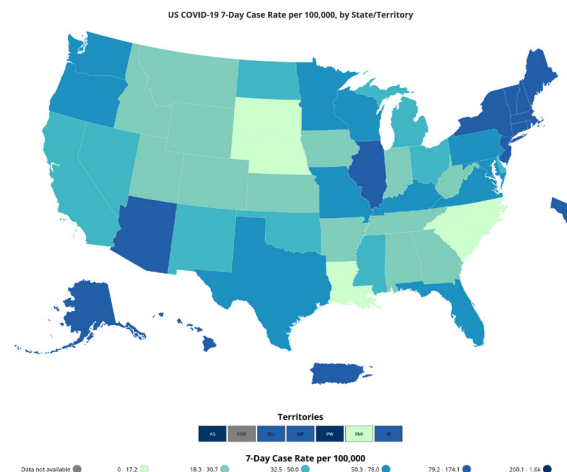

A probable case or death is defined by:

- meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 855,874,275
- Positive tests reported: 78,651,086
- Percent of positive tests (7-day): 3.4%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #424 APRIL 11, 2022

RATES OF COVID-19-ASSOCIATED HOSPITALIZATION BY RACE/ETHNICITY, CA.

For the week ending on 4/2/22, CDC data shows that AIAN statewide had a COVID-19 hospitalization rate of 0.0 per 100,000 population, which is lower when compared to Whites (1.3 per 100,000).

COVID-19 VARIANTS OF CONCERN, CALIFORNIA

As of April 6th, 526,575 samples have been sequenced in California. In February 2022, 12% of 324,166 cases in California had been sequenced. In January 2022, 2% of 2,540,142 cases were sequenced. In December 2021, 10% of 699,385 cases were sequenced. The chart below shows the percent of specimens sequenced by month that are variants of concern/interest. The table below shows the percent of specimens sequenced by recent weeks that are variants of concern/interest statewide.

Week Ending	Alpha	Beta	Gamma	Delta	Epsilon	Lambda	Mu	Omicron
3/16/22	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	100.0%

Fully Vaccinated by Race/Ethnicity, California

The graph to the right shows that as of April 6 2022, 56.7% of the eligible AIAN population statewide has been fully vaccinated (vs. 66.5% among Whites)

Note: Population estimates do not include "other" or "unknown" race and ethnicity categories, therefore their percentage of state population is not available. Some race/ethnicity groups in this county may have small populations. Where the county of residence was not reported, the county where vaccinated is used. Data is not shown where there are fewer than 11 records in a group.

Vaccination Progress by Race/Ethnicity, California.

Race	Fully Vaccinated	Partially Vaccinated	Unvaccinated	Eligible Population
AIAN[^]	92,786 (56.7%)	16,500 (10.1%)	54,438 (33.2%)	163,724
